

AKALESH TANWAR

Node.js Developer | 4+ Years Experience

akaleshtanwer5014@gmail.com | +91-7223863868 | linkedin.com/in/akaleshTanwer | github.com/atanwer | atanwer.github.io

PROFESSIONAL SUMMARY

Backend-focused Full Stack Developer with 4+ years of experience designing, building, and scaling secure REST APIs and server-side systems using Node.js, Express.js, PostgreSQL, and MongoDB. Proven track record of engineering 20+ production APIs with JWT authentication and RBAC across enterprise systems with zero unauthorized-access incidents, cutting backend response latency by ~40%, and automating CI/CD pipelines to reduce deployment time by ~40%. Experienced managing cloud infrastructure on AWS (EC2, Cognito, ECS, ECR), Docker, and VPS environments while maintaining 99.9% uptime for international clients across Australia and India.

TECHNICAL SKILLS

Backend: Node.js, Express.js, RESTful API Design, JWT Authentication, RBAC, Strapi CMS, Microservices

Databases & ORMs: PostgreSQL, MongoDB, MySQL, Supabase, Prisma, Sequelize, Mongoose

Cloud & DevOps: AWS (EC2, Cognito, ECS, ECR), Docker Containers, GitHub Actions, CI/CD Pipelines, Vercel, Render, Heroku, VPS

Payments & Integrations: Razorpay, PayPal

Frontend (working knowledge): React.js, Next.js, TypeScript, Redux Toolkit

Tools & AI: Git, GitHub, Postman, Jira, Trello, VS Code, Cursor, GitHub Copilot, Claude, Agentic AI

PROFESSIONAL EXPERIENCE

Software Engineer — *TechyMonks*

May 2025 – Present

- Reduced production issues by ~20% by improving API error handling and strengthening backend application stability.
- Improved system performance by optimizing data-fetching workflows and reducing unnecessary API load, resulting in a smoother end-to-end user experience.
- Collaborated with backend engineers, product managers, and stakeholders to convert business requirements into scalable technical solutions while maintaining consistent sprint delivery timelines.
- Facilitated client requirement discussions and technical planning sessions, helping define project scope, minimize rework, and accelerate delivery.

Full Stack Developer — *Alcyone Technologies Pvt. Ltd.*

Nov 2024 – Feb 2025

- Strengthened API integration reliability by standardizing response handling across 6+ backend modules, eliminating data inconsistency errors.
- Resolved 10+ critical runtime issues in a live application within the first 4 weeks, restoring stability for hundreds of active users.
- Coordinated with backend teams to streamline feature delivery, reducing integration delays by ~15% during release cycles.

React Engineer — *Gravity Engineering Services Pvt. Ltd.*

Jul 2024 – Aug 2024

- Integrated Strapi CMS as the content backend, reducing content update turnaround from 3+ hours to under 10 minutes by empowering non-technical staff to manage content independently.
- Worked on a high-performance company website achieving a Google Lighthouse performance score of 90+ with SEO-optimized page structure.

Full Stack Developer — *Aurasoft Digitech Pvt. Ltd.*

Jan 2022 – May 2024

- Engineered 20+ secure REST APIs with JWT authentication and RBAC across 3 enterprise systems, maintaining zero unauthorized-access incidents through role-validated endpoint design.
- Architected and shipped 8+ full-stack applications using Node.js, TypeScript, MongoDB, and PostgreSQL, supporting multiple concurrent production clients.
- Automated CI/CD pipelines via GitHub Actions, reducing deployment time by ~40% and eliminating manual release errors.
- Managed cloud deployments across AWS (EC2, Cognito), Vercel, Render, and VPS — maintaining 99.9% uptime across all production environments.

- Mentored 3 junior developers through structured code reviews on backend architecture and API design, lifting team code quality scores and halving average review-to-merge cycle time.

Frontend Developer Intern — *Aurasoft Digitech Pvt. Ltd.*

Sep 2021 – Dec 2021

- Built 10+ responsive UI components using HTML, CSS, Bootstrap, and JavaScript, contributing to 3 internal application modules during a 4-month internship.
- Resolved 15+ cross-browser compatibility bugs, raising visual consistency scores across internal applications.

KEY PROJECTS

Buybox Cartel — Real Estate Investment Platform

- Built scalable REST APIs handling lead and property workflows for 500+ properties, with structured automation reducing manual ops by ~35%.
- Enforced RBAC for a secure multi-user system with 4 distinct access tiers, achieving zero privilege-escalation incidents post-launch.
- Optimized database queries, trimming average backend response latency by ~40% and cutting dashboard load time in half.

MECOC — Event Management System

- Designed a JWT + RBAC authentication system supporting 4 user roles and real-time session management for a multi-role event platform.

Empowerwealth — Real Estate Platform

- Contributed to backend architecture decisions and managed deployment strategy, achieving zero-downtime releases.

Other: Ubragga (React Native gaming), Qahwah (e-commerce), Spade Telecom (info web app), Arcsine (analytics dashboard), Quick Support (fintech)

EDUCATION

MCA — Maharaja Ranjit Singh College, Indore (2019–2021)

BSc Computer Science — Maa Narmada Degree College, Dhamnod (2016–2019)

CERTIFICATIONS

Responsive Web Design — freeCodeCamp

JavaScript Algorithms & Data Structures — freeCodeCamp
