

AKALESH TANWAR

Backend Developer — Node.js / Express.js / REST APIs — 4+ Years Experience

akaleshtanwer5014@gmail.com | +91-7223863868 | linkedin.com/in/akaleshtanwer | github.com/atanwer | atanwer.github.io

PROFESSIONAL SUMMARY

Backend Developer with 4+ years of experience designing, building, and securing server-side applications and REST APIs using Node.js, Express.js, and TypeScript. Skilled in database architecture across both SQL (PostgreSQL, MySQL) and NoSQL (MongoDB) systems, with proven expertise in JWT authentication and RBAC — engineering secure APIs across multiple enterprise systems while maintaining zero unauthorized-access incidents. Experienced optimizing database queries and backend response latency, automating CI/CD pipelines via GitHub Actions and Docker, and managing cloud deployments on AWS with 99.9% uptime. Comfortable owning backend architecture decisions, mentoring junior developers through structured code reviews, and collaborating closely with frontend engineers and product stakeholders in fast-paced Agile teams for international clients across Australia and India.

TECHNICAL SKILLS

Backend	Node.js, Express.js, RESTful API design, API Versioning, Zod (schema validation), JWT Authentication, RBAC, Strapi CMS
Databases	PostgreSQL, MySQL (SQL), MongoDB (NoSQL), Supabase ORMs: Prisma, Sequelize, Mongoose
Security	Authentication & authorization across systems/environments, RBAC, role-validated endpoint design, data protection
Testing	Jest, Vitest, Cypress — hands-on experience writing and running unit and integration tests
Product & Delivery	Feature Flags, PostHog (product analytics & feature management)
Cloud & DevOps	AWS (EC2, Cognito, S3, ECS, ECR), Docker, GitHub Actions, CI/CD Pipelines, Vercel, Render, Heroku, VPS
Frontend	React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3
Tools & AI	Git, GitHub, Postman, Jira, Trello, VS Code, Cursor, GitHub Copilot, Claude, V0, Agentic AI, Python, Google Colab, LangChain, Tavily, FAISS

PROFESSIONAL EXPERIENCE

Software Engineer <i>TechyMonks</i>	1 May 2025 – 30 Jul 2026
- Reduced production issues by ~20% across full-stack web applications through targeted fixes, improved API error handling, and stronger application stability — directly improving system reliability and performance. - Collaborated cross-functionally with backend engineers, product managers, and stakeholders to convert business and data requirements into scalable technical solutions, maintaining consistent sprint delivery. - Led client requirement discussions and technical planning sessions, shaping project scope and accelerating feature delivery.	
Full Stack Developer <i>Alcyone Technologies Pvt. Ltd.</i>	13 Nov 2024 – 28 Feb 2025
- Strengthened API integration reliability by standardizing response handling across 6+ backend modules, eliminating data-consistency errors. - Collaborated with cross-functional teams to streamline feature delivery, reducing integration delays by ~15% during release cycles.	
React Engineer	5 Jul 2024 – 30 Aug 2024

Gravity Engineering Services Pvt. Ltd.

- Integrated Strapi CMS, configuring content models and APIs that cut content update turnaround from 3+ hours to under 10 minutes for non-technical staff.

Full Stack Developer

1 Jan 2022 – 6 May 2024

Aurasoft Digitech Pvt. Ltd.

- Architected and built the backend for 8+ full-stack applications using Node.js, TypeScript, MongoDB, and PostgreSQL for multiple concurrent production clients — covering both SQL and NoSQL data stores.
- Engineered 20+ secure REST APIs with JWT authentication and RBAC across 3 enterprise systems, maintaining zero unauthorized-access incidents through role-validated endpoint design and modern access-management practices.
- Mentored 3 junior developers through structured code reviews, raising team code quality and halving average review-to-merge cycle time.
- Automated CI/CD pipelines via GitHub Actions and Docker, reducing deployment time by ~40% and eliminating manual release errors.
- Managed cloud deployments across AWS (EC2, Cognito, S3), Vercel, Render, and VPS, maintaining 99.9% uptime across all production environments.

Frontend Developer Intern

22 Sep 2021 – 31 Dec 2021

Aurasoft Digitech Pvt. Ltd.

- Contributed to internal application modules during a 4-month internship, gaining foundational full-stack development experience and debugging skills across the stack.

KEY PROJECTS

Buybox Cartel — Real Estate Investment Platform — Built scalable REST APIs for lead and property workflows across 500+ properties, reducing manual ops by ~35%; enforced RBAC across a 4-tier multi-user system with zero privilege-escalation incidents; optimized database queries, cutting backend latency ~40% and dashboard load time in half.

MECOC — Event Management System — Designed JWT + RBAC authentication with real-time session management for a multi-role platform (Admin, Speakers, Exhibitors, Delegates) with dynamic role-based routing, delivered on time with zero post-launch critical bugs.

Empowerwealth — Real Estate Platform — Contributed to architecture decisions and deployment strategy across 3 product modules, achieving zero-downtime releases.

Other: Ubragga (React Native gaming), Qahwah (e-commerce), Spade Telecom (info web app), Arcsine (analytics dashboard), Quick Support (fintech)

EDUCATION

MCA

Maharaja Ranjit Singh College, Indore · 2019–2021

BSc Computer Science

Maa Narmada Degree College, Dhamnod · 2016–2019

CERTIFICATIONS

- Responsive Web Design — freeCodeCamp
- JavaScript Algorithms & Data Structures — freeCodeCamp
