

AKALESH TANWAR

Full Stack Engineer — React.js / Node.js / TypeScript — 4+ Years Experience

akaleshtanwer5014@gmail.com | +91-7223863868 | linkedin.com/in/akaleshtanwer | github.com/atanwer | atanwer.github.io

PROFESSIONAL SUMMARY

Full Stack Engineer with 4+ years of experience designing and delivering secure, scalable web applications across the complete stack — from React.js/Next.js frontends to Node.js/Express REST APIs backed by PostgreSQL and MongoDB. Skilled at translating product and data requirements into robust technical solutions, integrating external systems and APIs, and optimizing system performance. Experienced with cloud deployment (AWS EC2/Cognito, Vercel, Render), Docker containers, and CI/CD automation via GitHub Actions. Comfortable leading code reviews, mentoring engineers, and working in fast-paced Agile teams for international clients across Australia and India.

TECHNICAL SKILLS

Frontend	React.js, Next.js, React Native, Redux Toolkit, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS
Backend	Node.js, Express.js, RESTful APIs, JWT Authentication, RBAC, Strapi CMS
Databases	PostgreSQL, MySQL, MongoDB (SQL & NoSQL), Supabase ORMs: Prisma, Sequelize, Mongoose
Cloud & DevOps	AWS (EC2, Cognito, ECS, ECR), Docker, GitHub Actions, CI/CD Pipelines, Vercel, Render, Heroku, VPS
Architecture	API integration & third-party systems, system design, performance optimization, secure identity/access management
Tools & AI	Git, GitHub, Postman, Jira, Trello, VS Code, Cursor, GitHub Copilot, Claude, V0, Agentic AI, Python, Google Colab, LangChain, Tavily

PROFESSIONAL EXPERIENCE

Software Engineer

1 May 2025 – 30 Jul 2026

TechyMonks

- Reduced production issues by ~20% across full-stack web applications through targeted fixes, improved API error handling, and stronger application stability — directly improving system reliability and performance.
- Optimized component rendering and data-fetching workflows, cutting unnecessary API requests and delivering a smoother, higher-performing user experience.
- Collaborated cross-functionally with backend engineers, product managers, and stakeholders to convert business and data requirements into scalable technical solutions, maintaining consistent sprint delivery.
- Led client requirement discussions and technical planning sessions, shaping project scope and accelerating feature delivery.
- Built and maintained reusable, well-documented frontend components in React.js and Next.js, improving maintainability across projects.

Full Stack Developer

13 Nov 2024 – 28 Feb 2025

Alcyone Technologies Pvt. Ltd.

- Resolved 10+ critical runtime issues in a live React Native application within 4 weeks, restoring stability for hundreds of active users.
- Strengthened API integration reliability by standardizing response handling across 6+ backend modules, eliminating data-consistency errors.
- Coordinated with backend teams to streamline feature delivery, reducing integration delays by ~15% during release cycles.

React Engineer

5 Jul 2024 – 30 Aug 2024

Gravity Engineering Services Pvt. Ltd.

- Built a high-performance company website in Next.js + Tailwind CSS, achieving a Google Lighthouse score of 90+ with SEO-optimized page structure.
- Integrated Strapi CMS, cutting content update turnaround from 3+ hours to under 10 minutes for non-technical staff.
- Refined UI responsiveness across 5+ device breakpoints, raising mobile accessibility compliance to WCAG 2.1 AA standards.

Full Stack Developer

1 Jan 2022 – 6 May 2024

Aurasoft Digitech Pvt. Ltd.

- Architected and shipped 8+ full-stack applications using React.js, Node.js, TypeScript, MongoDB, and PostgreSQL for multiple concurrent production clients — covering both SQL and NoSQL data stores.
- Engineered 20+ secure REST APIs with JWT authentication and RBAC across 3 enterprise systems, maintaining zero unauthorized-access incidents through role-validated endpoint design and modern access-management practices.
- Accelerated frontend delivery by 30% by building a reusable component library and optimizing Redux Toolkit state flows, cutting duplicated code across 3 products.
- Mentored 3 junior developers through structured code reviews, raising team code quality and halving average review-to-merge cycle time.
- Automated CI/CD pipelines via GitHub Actions and Docker, reducing deployment time by ~40% and eliminating manual release errors.
- Managed cloud deployments across AWS (EC2, Cognito), Vercel, Render, and VPS, maintaining 99.9% uptime across all production environments.

Frontend Developer Intern

22 Sep 2021 – 31 Dec 2021

Aurasoft Digitech Pvt. Ltd.

- Built 10+ responsive UI components using HTML, CSS, Bootstrap, and JavaScript across 3 internal application modules during a 4-month internship.
- Resolved 15+ cross-browser compatibility bugs, improving visual consistency across internal applications.

KEY PROJECTS

Buybox Cartel — Real Estate Investment Platform — Built scalable REST APIs for lead and property workflows across 500+ properties, reducing manual ops by ~35%; enforced RBAC across a 4-tier multi-user system with zero privilege-escalation incidents; optimized database queries, cutting backend latency ~40% and dashboard load time in half.

MECOC — Event Management System — Shipped a multi-role platform (Admin, Speakers, Exhibitors, Delegates) with dynamic role-based routing, delivered on time with zero post-launch critical bugs; designed JWT + RBAC authentication with real-time session management.

Empowerwealth — Real Estate Platform — Built a reusable component library that accelerated feature development by ~25% and unified UX across 3 product modules; contributed to architecture decisions and deployment strategy, achieving zero-downtime releases.

Other: Ubragga (React Native gaming), Qahwah (e-commerce), Spade Telecom (info web app), Arcsine (analytics dashboard), Quick Support (fintech)

EDUCATION

MCA

Maharaja Ranjit Singh College, Indore · 2019–2021

BSc Computer Science

Maa Narmada Degree College, Dhamnod · 2016–2019
